14 CONTEMPORARY COLOURS THAT DON'T FENCE YOU IN

The COLORBOND® steel difference

Make sure you insist on fencing made from genuine COLORBOND® steel. Imported imitations are not backed by the strength and integrity of Australia's BlueScope Steel.

This simple checklist demonstrates why you should insist on fencing made from genuine COLORBOND® steel:

- ✓ New improved Super Polyester pre-painted coating technology keeps your fence looking newer for longer.
- ✓ More than 30 years of intensive weather testing in Australia, proven to withstand our harsh conditions.
- ✓ Bushfire testing by the CSIRO & Bushfire Co-operative Research Centre proves steel fencing can help protect your property from bushfires*.
- ✓ Available in 14 designer colours to complement and enhance your home and landscape.
- ✓ Provides greater scope for creating a fencing design solution to suit any landscape design.
- ✓ 100% Termite proof - no need to apply chemical treatments to a fence made from COLORBOND® steel.
- ✓ Low maintenance - an occasional hose or wipe down and removal of any debris is all that's required to maintain your fence.
- ✓ Meets Australian Standards AS1397 & AS2728, guaranteeing coated mass and paint film thickness - your assurance of consistent quality.
- ✓ Fencing infill sheets are made from a corrosion resistant base of ZINCALUME® steel with a base metal thickness of 0.35mm, your assurance of strength and durability.
- ✓ Backed by a 10 year warranty** from BlueScope Steel Limited.
- ✓ Laser engraved with the COLORBOND® steel logo, your guarantee of superior performance and quality.
