TWO WAY YELLOW

SWAREFLEX RPM

NOW AVAILABLE

Swareflex City Stud RPM's are designed for permanent use, e.g. Kerb marking in tunnels, bridges, roundabouts etc. or to separate bus and taxi lanes. City studs are highly visible at night due to their large number of glass reflector elements.

Depending on their respective fields of use, Swareflex glass elements are embedded in a variety of plastics which have proven to be perfect for outdoor use.

The advantages of Swareflex glass reflectors:

- * Low loss of reflection intensity compared with reflectors made of other materials
- * High resistance to breakage or scratches
- * Outstanding resistance to heat (up to 95 C), cold and UV light
- * Good resistance to chemicals e.g. Oil, petrol, cleaning solutions etc
- * Highly economical due to durability
