

NOW AVAILABLE

# NEW ALLOY DRAWERS

You can't copy engineering know-how!!

**ONLY 49KGS**

TWIN DRAWER 200 SERIES LANDCRUISER

## ADR Compliant

All our drawers systems made by the Oliver family are crash tested to ADSR compliancy by our friends at Automotive Safety Engineering in Lonsdale, SA.

We have been making drawers for over 20 years and Grad from ASE has been testing them from the word go.

We don't build anything for your vehicle that isn't safe for you and your family.

Mark Oliver  
Director  
RV Trade and Fleet P/L

Made**

## OUR NEW FULLY ALUMINIUM DRAWERS ARE NOW AVAILABLE TO ORDER.

We are very excited about these drawers as they offer a considerable weight saving over traditional steel drawers. Typical weight saving for a Alloy Twin Drawer system as opposed to a steel twin drawer system in a Land Cruiser 200 Series is 31KG !!!

An RV engineered alloy system makes a significant difference to the GVM of any vehicle – particularly when compared to any other alloy system on the market!

*You simply cannot beat engineering excellence and experience!*

### **NATIONAL 4x4 & FISHING BOATING EXPD SHOW NEWS**

- At the recent Melbourne 4x4 Show sales were strong with huge interest and positive feedback for the alloy drawers. The indication is that the new Alloy drawers will be a massive hit in the market place. We expect them to far exceed steel drawer sales for wagons.
- The new Alloy Twin Drawers are now available in the 900 and 1000 lengths with Inbuilt Fridge Slides.
- New Alloy Easy Access Combos are also now available in 900 and 1000 lengths.
- Ute 1400 drawers for dual cabs will follow by Christmas.
- The drawers are crash tested to 250kg rated carrying capacity - but our recommendation which is more in keeping with our "think light" policy is 150kg of evenly distributed weight. Otherwise you may as well install the stronger steel drawers at a lower cost.
- They are made using the same trusted and tested design that we pioneered over 20 years ago and still use today.
- We have added all the latest engineering updates so they are the latest design available.

**– SEE THEM AT THE UPCOMING SYDNEY, ADELAIDE AND PERTH SHOWS –**

**NOTE: All RV optional extras and accessories will fit our new Alloy drawers.**
