

# **The „Anti-Aging System“ - the perfect support for the skin**

**Tests are showing:**

Using daily the creams together in combination with the serums , you can reduce definitely the deepness of the wrinkles until 56 % .

**The Anti-Aging Concept – the perfect support for the mature skin !**

## **Q10 Phytocomplex Serum + Q10 Phytocomplex Cream**

### **Skin characteristics:**

- For an exigent skin with a tendency to wrinkles

### **Ingredients:**

- Q 10, Phytohormone, Vitamin E, Hyaluronic acid, Ceramide, Panthenol, evening primrose oil

### **Effects:**

- Q10 and Vitamin E against free radicals
- Stimulates the metabolism
- Activates the stromal cells due to the phytohormones
- Firms the tissue
- Reduces lines up to 56%

### **Individual profit:**

- Improves the skin elasticity
- Counters premature skin aging
- Reduces lines and creases

# The Anti-Aging Concept – the perfect support for the mature skin !

## O2 Energy Serum + O2 Energy Cream

### **Skin characteristics :**

- Paly, tired, loose skin with a bad blood flow

### **Ingredients:**

- Cerasome filled with Perfluorodecalin, Soya, Hyaluronic acid, Ivy extract, Vitamin E

### **Effects:**

- Increases the transport of O2 to the cells
- Stimulates the microcirculation
- Activates all processes of the metabolism in the epidermis
- Improves the elasticity of the tissue

### **Individual profit:**

- A freshness-kick for the skin
- Increases the O2 transport system in the skin
- Protects from the effects of pollution
- Smoothes, stimulates and firms the skin

# The Anti-Aging Concept – the perfect support for the mature skin !

## Q10 Vital Serum + Q10 Vital Cream

### Skin characteristics :

- For a dry skin with a tendency to deep wrinkles

### Ingredients:

- Q10, Hyaluronic acid, Ceramide, Retinol, Vitamin E, Macadamia Nut oil

### Effects:

- Activates the metabolism
- Moisturises
- Strengthens the cell structure
- Protects and improves the barrier function of the epidermis

### Individual profit:

- Care concept with a tripple effect:
  - Effect of moisture will be increased
  - Moisture link due to the activation of the barrier function of the skin
  - High-quality oils reduces immediately little dry creases

# The Anti-Aging Concept – the perfect support for the mature skin !

## D.N.A. Serum + D.N.A Cream

### Skin characteristics :

- For a skin with ultra-violet damage and skin aging

### Ingredients:

- DNA, ATP, Ceramide, Allantoine, Sheabutter

### Effects:

- Activates the cell metabolism
- Stimulates the collagen-synthesis
- Support of the repair-mechanism of the cells

### Individual profit:

- Reactivates cell activity
- Supports the skin's repair mechanism
- Prevents aging of the skin brought on by exposure to light ( sun or solarium )

## **The Anti-Aging Concept – the perfect support for the mature skin !**

### **Anti-Irritation Serum + Anti-Irritation Cream**

#### **Skin characteristics :**

- For a soothes, itchy, stressed or very dry skin

#### **Ingredients:**

- White tea, sand thorn oil, sun flower oil, extract of rice bran oil, soya

#### **Effects:**

- Reduces the itchiness of an allergic skin
- Activates the microcirculation of the capillares
- Stabilises the capillares and reduces red spots
- Protects the skin from free radicles, strengthens the skin´ s own defensive mechanisms

#### **Individual profit:**

- Systematic desensitisation of the skin against negative environmental impacts
- Harmonises, balances, calms and takes away the itchiness of an irritated skin
- First aid care for sensible and stressed skin

## The Anti-Aging Concept – the perfect support for the mature skin !

- Exclusive combination of serum and cream, achieves highest requirements
- Anti-Aging-Ingredients of the scientific results of the latest research
- Anti-Aging care is therefore care that is precautionary, prophylactic and preventative

# Signs of mature skin

- Decrease of the metabolism
- Slowdown of the cell division
- Reduction of the collagen-Synthesis and skin elasticity
- Reduction of the capacity to retain moisture in the skin
- Decrease of the production of the sebaceous and perspiration glands
- Decrease of the blood circulation in the skin

## **Ingredients of TIME CONTROL SYSTEM:**

### **Coenzyme Q10 und Adenosin Triphosphate ATP**

- Activate the metabolism
- Increase the activity of the mitosis
- Improves the regeneration of the skin

### **Phytohormones made out of soya**

- Ingredients which stimulates the activity of the cells of the connective tissue (Fibrozyten)
- Firms the connective tissue

### **Vitamine E - Tocopherol**

- in combination with Q10 , active protection against free radicles
- activates the regeneration of the epidermis
- reduces wrinkles

### **Perfluorodecalin (vital substance of the biomedizin)**

- increase the transportation of oxygen to the cells
- activates the microcirculation
- stimulates the metabolism, especially the ATP-synthesis
- it is encapsulated in Cerasomes

### **Ceramide**

- Ceramide activates the barrier function of the skin and therefore the skin cannot loose too much moisture

### **Hyaluronic acid**

- Is the most important component of the intercellular matrix of the connective tissue.
