# TEC7 CLEANER

## PROPERTIES

- Ideal for finishing TEC7 joints
- Ideal for surface preparation for TEC7 products
- Removes uncured X-TACK7, TEC7 and TRANS7
- Does not attack most surfaces
- Does not leave a greasy film

## TECHNICAL INFORMATION

**Colour:** colourless

**Odour:** slight solvent odour

**Condition at room temperature:** liquid

**Boiling point:** 138°C-175°C

**Vapour pressure:** 1,0KPA 20°C

**Flash point:** 27°C

**Spontaneous ignition:** 208°C

## APPLICATIONS

- Finishing joints created with TEC7 products
- Degreasing and cleaning of all surfaces before using adhesive and sealant products
- Removing adhesive residues from stickers or labels
- Removing residues of contact adhesives
- Degreasing and cleaning tools and workshop equipment, both hand tools and machines
- Does not attack lacquer or synthetic material
- Fast and safe degreasing of ferrous and non-ferrous metals before bonding or painting. TEC7 CLEANER will not form an oxide layer with light metals.

## USE

- Spray TEC7 CLEANER on the surfaces to be bonded and rub them dry with a clean cloth.
- Then allow TEC7 CLEANER to evaporate completely before bonding the materials.
- If necessary, repeat this treatment.
