

Professional TEC7 guns

1. The Tec7 guns are the perfect partners to our Tec7 product range for professionals and DIY enthusiasts alike.
2. Tec7 guns can be used for most products in cartridges or sausages regardless of the viscosity.
3. Tec7 guns can also be used for 2 component products thanks to the 1:18 compression ratio for cartridges and 1:12 compression ratio for sausages.
4. Both Tec7 guns have a flow stop control switch that enables a clean finish. The flow stop control switch is the black clip on the release trigger which offers two possibilities, down for continuous pressure, up for a slight regression of the piston to obtain a smoother and slower pouring (spouting) of softer products.
5. The Tec7 cartridge gun has a stainless steel piston rod with a hook at the end to allow the gun to be hung. This also reduces rust and corrosion issues.
6. The Tec7 guns have a reinforced transmission system, this sections of the gun will require lubrication from time to time, there is an embossed logo on the gun indicating where to lubricate.
7. The Tec7 guns are ergonomic in use thanks to its balance and spinning handle which enables placing the nozzle at the right angle, even when applying product around corners.
8. The Tec7 guns are of very solid construction, substantially increasing its life span.
9. The Tec7 cartridge gun has an open cartridge holder making changing over cartridges quick and easy.
10. The Tec7 cartridge gun has a 1:18 compression ratio, while the 600ml sausage gun boasts a 1:12 compression ratio, making the Tec7 guns more effective and easier to dispense product.
