

FINISHES

Powder Coating

Powder-coat, once oven cured, becomes a solid and tough coating which adheres to the surface of properly pre-treated substrate. Powder coatings can be made in a multitude of colours, with various luster's, textures and special effects. The great range of colour options, make powdercoating a versatile and popular choice.

Features and Benefits

- Low cost.
- Large colour range.
- Can be applied to a range of different substrates.
- Custom colours are available made to order.

Anti Graffiti Powder Coat

An anti graffiti powder coating that allows the removal of permanent markers and spray paint.

Features and Benefits

- Can be applied to a range of different substrates.
- Allows easy removal of most forms of graffiti.
- Excellent solvent resistance.
- Custom colours are available made to order.

Classic Oxide™

A new powder coat colour that has been created as an alternative to the popular weathering steel, best known under the trademark of Corten®.

Features and Benefits

- Finish has consistent tone and texture.
- Can be applied to a range of different substrates.
- Don't need to wait 2-3 months for the panels to oxidise.
- Doesn't stain the surrounding area with oxidisation run off.
- Don't need a sealer coating when being used in an internal application.
- When Applied to Aluminium it offers a light weight alternative, resulting in reduced structural requirements for the cladding substructure lowering the building cost.

Aluminium Anodising

Aluminium Anodised finishes, result in the controlled formation of an oxide layer which is much harder, more durable and about a thousand times thicker than the thin oxide layer naturally formed. It has excellent tolerance in coastal environments and is available in a range of different colours.

Features and Benefits

- Excellent tolerance in coastal environments.

Disadvantages

- Clamp marks.
- High cost.
