

Australia Day

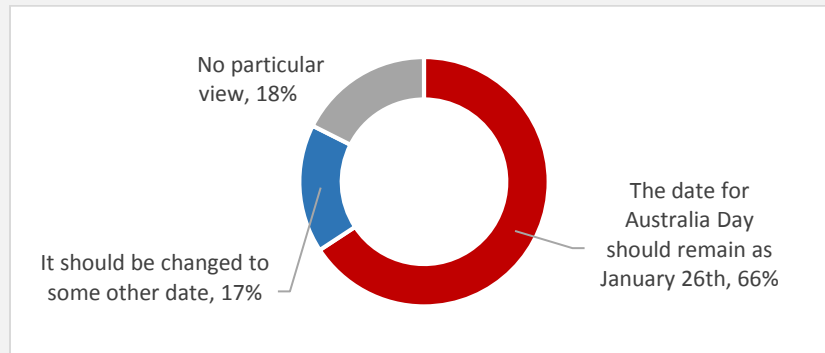

Should the date for Australia Day be changed?

This survey was conducted online by OmniPoll over the period February 2-7, 2017 among a national sample of 1,237 people aged 18 years and over. The results have been post-weighted to Australian Bureau of Statistics data to reflect the population distribution for age, sex, area and highest level of schooling completed.

Some people have suggested the date for Australia Day (January 26th each year) should be changed. Do you personally think...?

Two thirds want Australia Day to remain as January 26th

There are no differences by gender, but some interesting results by age: the older people are, the more attached to the current date they are
